

## 853-001198-002 AutoEtch Inner Gate Assembly - Quick Exchange Option and Repair

### Features

- Brand New Gates
- Exchange & Refurbishing Services Available
- New Anodized Door
- New Gate Stops
- New Screws
- New Bearings
- New Bushings
- New Shims
- New Spring
- New Sprocket
- New Compression Fitting
- New Mounting Hub
- New Clevis
- New Roll Pins
- Full Functionality Tested

### [View Product](#)

The AutoEtch Gate assembly is a precision mechanical isolation barrier between atmosphere/load locks & the main chamber of the AutoEtch. It is designed for repeatable precision wafer processing and will function flawlessly for thousands of cycles depending on process chemistry. **Applications Include:** All Lam Research Standalone AutoEtch 490, 590, 690 & 790 Platforms.

SemiGroup is The Leader in After-Market Semiconductor Equipment Support and Industrial Manufacturing Equipment!

SemiGroup's technical expertise assures you the highest quality of new and refurbished parts and assemblies available on the market. All parts and assemblies are configured to meet or exceed the OEM (Original Equipment Manufacturer's) Specifications.

Semigroup also offers Refurbishment Services on an array of products and services ranging from Printed Circuits Boards, Robot Assemblies, Servo Motors, Servo Motor Controllers, Servo Motor Drivers, Servo Packs, Consumable Parts, Gate Assemblies or Slit Valves, Elevator Indexer Assemblies, Lead Screws and Ball Screws, Lifter Assemblies, Temperature Controllers, Harmonic Drives, Gap Drive Assemblies, Arm Assemblies, User Interfaces and Human Interface Devices, Maintenance Kits, Standard and Custom Bellows Assemblies, Temperature Controls Units, Heat Exchangers, Chillers, Solid State Chillers, Thermoelectric Recirculating Chillers, CMP Assemblies, Chemical Mechanical Planarization Parts and Services, Pad Conditioner Arms, Rotary Unions, Custom Cases, Interface Units, Power Supplies, High Voltage Power Supplies, DC Power Supplies, Custom Power Supplies, Vacuum Pumps, Scroll Pumps, RF Generators, RF Matches, Turbo Pumps, Turbo Pump Controllers, High Vacuum Valves, Throttle Valves, Pressure Controllers, Mass Flow Controllers, Impellers, Filters and much more!
